REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Takasan et al. (US 6,779,650) discloses a method and apparatus for levitating an object by sound waves that includes a rigid support structure, a thin oscillatory element arranged in parallel to the top surface of the support structure and a vibration generator that causes the thin oscillatory element to vibrate and levitate objects thereon. However, the thin oscillatory element does not levitate above the top surface of the support structure as required by the independent claims because it is supported by rigid support elements and because it is distanced from the rigid support too much to allow be levitated above the top surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
